

Do you have **ASTHMA**?

The staff at your practice are taking part in a **research study** to improve care for patients with asthma.

GP practice **staff training** and **alerts** to reduce emergency hospital admissions and deaths due to asthma

Information about patients will be used to see if the study has helped, but your details will remain confidential. No action is required on your part. Further details, including what to do if you choose to opt out of your data being used in this way, are in a **leaflet at reception**, or you can visit our **website**, or use the **contact details below**.
